PRECISE. PROVEN. PERFORMANCE.

Quickbooks

At Moore Stephens we work closely with the leading cloud accounting software providers so whichever product you decide is right for you, we can help.

Here's how QuickBooks could benefit your business:

Get things done when you're on the go

With QuickBooks you can run your business anytime, anywhere, on any device. You can access real-time customer information and send estimates or invoices from your iPad, iPhone or Android device.

Enriched collaboration with Moore Stephens

The ability to share up-to-date financial information at a click of a button means you can work in real-time with your accountants. Giving instant and secure access to your team at Moore Stephens means you can say goodbye to posting and emailing sensitive documents.

Create branded invoices and quotes

With QuickBooks you can quickly generate and send personalised, professional invoices and quotes and see when they've been viewed and paid online. The GoCardless app makes it easy to accept Direct Debit payments.

Connect to your business bank account

With QuickBooks you can automatically import and reconcile bank account transactions from your bank – saving you time on manual data entry.

Track and manage your tax

You can instantly view your tax liability and get all you need to complete your tax return. QuickBooks gives you a detailed breakdown for self-assessment including how much you owe.

VAT made simple

QuickBooks calculates and tracks VAT automatically and prepares accurate returns so you can be HMRC compliant.

Track sales and expenses

You'll get an up to date view of sales, full details of expenses and a clear view of profit. QuickBooks matches transactions automatically to your sales and expenses saving you time on manual reconciliation.

Track mileage

Automatic tracking means your mileage is always accurate and every business mile goes towards your annual deductions.

Payroll

QuickBooks creates employee payslips, sends RTI data to HMRC and manages auto-enrolment, allowing easy tracking of PAYE, NI and other deductions.

Customised reports

QuickBooks' real-time dashboards and fully customisable reports give you the key information you need to run your business, including balance sheet, profit and loss and cashflow statement.

What is cloud accounting software?

Cloud accounting software is an online application for bookkeeping and accounts. So instead of maintaining business records on paper, spreadsheets or desktop software packages, you post and access your records via the internet.

With the introduction of HMRC's Making Tax Digital programme, businesses will soon be required to use accounting and bookkeeping software compatible with HMRC's online system.

Automatic backups

Your data is automatically backed up every day, keeping your figures safe.

Low Cost Monthly Subscriptions

By signing up to a monthly subscription, you are not expected to pay out a large invoice once a year, which can help to improve cash flow. QuickBooks has a number of plans to suit your business needs, from freelancers and independent contractors to small businesses and VAT registered companies. Packages cost between £6 and £25 per month* and there's no obligation, you can cancel anytime.

Next steps

If you want to realise the benefits of cloud accounting using QuickBooks please get in touch with one of our accounting software experts or your usual Moore Stephens contact. You can also find out more at quickbooks.co.uk

Moore Stephens says

“QuickBooks Online is a good choice for those with small amounts of data to enter who are reasonably familiar with accounting concepts and language. The range of reporting options available makes this an appealing choice for those who prepare management accounts or need to present summary data frequently.”
