PRECISE. PROVEN. PERFORMANCE.

Sage Business Cloud Accounting

At Moore Stephens we work closely with the leading cloud accounting software providers so whichever product you decide is right for you, we can help.

Benefits of Sage Business Cloud Accounting

Anywhere, anytime

At work, at home, or on-the-go, Sage is on your computer, tablet, and phone, whenever you need it. The software is compatible with PCs, Macs, iOS and Android.

Collaborate and share

Both you and your accountant work on real-time data – meaning our team at Moore Stephens can give you instant advice based on the very latest figures.

Easy invoicing

With Sage you can create quotes, estimates, and invoices in seconds, send them to your customers, and track what they owe. The software even watches your bank account for their payments.

Connect your bank

Bank data flows in and is reconciled automatically, saving you time on tedious data entry and giving you an update to date view of your finances.

Know your cash flow

Track your income and expenses, see how much each customer owes at-a-glance, and chase overdue balances. Cashflow forecasts are based on your latest bank data so you can plan ahead by estimating how much money your business will have or need in future.

Take care of VAT

Sage calculates and submits HMRC VAT returns – giving you the confidence that you're compliant with current regulations.

Grows with your business

As you expand, it's easy to add additional users and companies. The software integrates with a vast number of add-ons and third party apps to provide even more functionality as and when you need it.

Reports and insight

Profit & loss, balance sheet, trial balance, and more – up to the minute reports help you make key business decisions. Departmental analysis and a basic job costing module is also included.

Stock management

Plan and track your inventory and manage stock levels easily.

Multi-currency accounting

With Sage you can record transactions and create invoices in multiple currencies, calculate exchange rates and bank charges automatically and easily work out VAT for EU and non-EU sales and purchases.

What is cloud accounting software?

Cloud accounting software is an online application for bookkeeping and accounts. So instead of maintaining business records on paper, spreadsheets or desktop software packages, you post and access your records via the internet.

With the introduction of HMRC's Making Tax Digital programme, businesses will soon be required to use accounting and bookkeeping software compatible with HMRC's online system.

Safe and secure

Sage boasts bank-level security and no need for backups, so peace of mind comes as standard.

Sage support

24/7 phone and email support, and web chat.

Sage Accounting Start

Sage also offer a more basic package, Sage Accounting Start, which is ideal for sole traders and freelancers.

Low cost monthly subscriptions

As a Sage Accountant Partner, Moore Stephens are able to offer the Sage Accounting package at just £15 (+VAT) per month, and Sage Accounting Start at £5 (+VAT) per month*.

Next steps

If you want to realise the benefits of cloud accounting using Sage please get in touch with one of our accounting software experts or your usual Moore Stephens contact. You can also find out more at www.sage.com

Moore Stephens says

“Sage Accounting is a good, solid offering. Simple and easy to use, it is ideal for those who haven’t used accounting software before. As your business grows, Sage offers a range of add-ons including Payroll and Payments so you can tailor a solution to suit your needs. Sage are continually developing the software with new features being added all the time. It looks very different to the desktop version, but much of the core functionality is replicated which may appeal to existing desktop users. For existing users of Sage 50 desktop, Moore Stephens are able to migrate up to four years’ worth of historical data over to the cloud. ”
